Professional Summary

Software Development Engineer (SDE-1) with hands-on experience building production-ready full-stack and mobile products. Worked across frontend, backend, and API development using React.js, TypeScript, Node.js, Express.js, and REST APIs, contributing to applications used by millions of users. Strong foundation in Data Structures, Algorithms, DBMS, and software design, with a focus on building reliable, user-centric, and maintainable solutions.

Experience

Software Development Engineer (SDE-1) – Intern to Full-Time

Dec 2025 – Present

4 Way Technologies Inc.

Delhi/NCR

Intern: Dec 2025 – Feb 2026 | Full-Time: Mar 2026 – Present

- Built and maintained production web and mobile applications using React.js, React Native, TypeScript, and Node.js, serving millions of users across critical business workflows.
- Developed responsive frontend modules, admin dashboards, and user-facing workflows to improve usability, operational efficiency, and product performance.
- Designed and implemented backend services and REST APIs with Node.js and Express.js to support business logic, data flow, and application integrations.
- Diagnosed and resolved production issues using Sentry and Axiom logs, improving system reliability and reducing downtime.
- Followed Git/GitHub best practices, including branching, pull requests, and code reviews, to maintain clean, scalable, and production-ready code delivery.

Software Development Intern

Jun 2025 – Aug 2025

Bluestock Fintech

Remote

- Developed application modules for user and organization workflows using React.js, Node.js, and PostgreSQL to improve operational efficiency.
- Built and tested REST APIs for core business processes, improving maintainability and workflow automation.
- Implemented JWT-based authentication and role-aware authorization to secure application access and user data.
- Processed and analyzed financial datasets using Python and Pandas to support reporting and data-driven decision-making.

Projects

TALKIO – Real-Time Chat Application

MERN Stack, Socket.IO, JWT, Docker

- Built a real-time chat platform with private and group messaging using Socket.IO, enabling seamless live communication.
- Implemented JWT authentication, secure session handling, and user access control for a reliable messaging experience.
- Designed MongoDB schemas for chat data models and containerized the application with Docker for consistent deployment.

Banking Management System API

Java, Spring Boot, MySQL, JPA

- Developing RESTful APIs for account management and core banking workflows using Spring Boot.
- Implemented a Controller–Service–Repository structure to keep the application modular, maintainable, and scalable.
- Integrated MySQL with JPA for persistence and validated endpoints using Postman to ensure reliable API behavior.

Skills

Languages:	Java, Python, JavaScript, TypeScript, SQL
Frontend:	React.js, React Native, TypeScript, Tailwind CSS, Redux Toolkit
Backend:	Node.js, Express.js, Spring Boot, REST APIs, JWT Authentication
Databases:	MySQL, MongoDB, PostgreSQL
Tools & Platforms:	Git, GitHub, Docker, Postman, Sentry, Axiom, Linux, AWS (Basic), Google Cloud
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Education

Galgotias University, Greater Noida

2022 – 2026

B.Tech in Computer Science & Engineering

CGPA: 7.2

Senior Secondary (12th – PCM), Uttar Pradesh Board

69.4% 2022

Secondary (10th), Uttar Pradesh Board

76% 2020

Certifications

Java Foundations – Oracle
Cloud Security – Palo Alto Networks

AWS Data Engineering – AWS Academy
Software Engineering – IBM

Achievements

- Solved 100+ algorithmic problems across LeetCode, GeeksforGeeks, and HackerRank to strengthen problem-solving skills.
- Contributed to a production-level AI-powered chat platform with real users, improving feature delivery and product experience.
